A compelling story
for those who say
"it can't happen here"

MACLEAN'S

FEBRUARY 15 1954 CANADA'S NATIONAL MAGAZINE 35 CENTS

The Spike that started **A NATION ON THE MOVE**

At CHAMPLAIN, QUE., the blast of a sledge drove home the first spike, joining Canada by railroad from coast to coast. The date was November 26, 1885.

Now, this young nation has space for business and progress to meet and solve the challenge of its own existence. This first train from Canada brought of steel rails, railroad and only goods and people did the high expectations of a nation that sought little a new era of industry and a new sense of economic unity. These hopes were, more than realized. The railroad created new communities, brought settlers for the land and industry for the city. Among the industries was the Dunlop Tire and Rubber Goods Company Limited which now serves in the name of the country, unified, it appears, in serving the transportation needs of Canada.

Transportation is Dunlop's business. Dunlop products

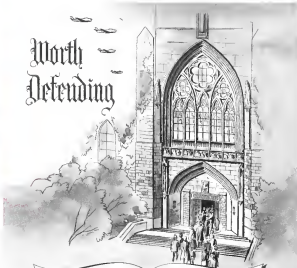

are made to keep things moving. The productive resources and resource facilities of the world with Dunlop organizations were, are here in the requirements of the young Dominion of the North. Dunlop products must be made to the times, to the times, to the times, to the times, to the times.

Today, Dunlop's contribution is the task of keeping Canada on the move in efficient, economical, safe, strong, and solid and water and to the air. Dunlop products carry and from the sea, what from the streets, ships, all over the world. There are a dozen Dunlop products in use in today's transport. There are Dunlop products for bicycles, passenger cars, trucks and aircraft—for the modern house too. All these products are made to provide lighter standards of safety, comfort and efficiency. And they help keep Canada, its people and its products on the move.

DUNLOP keeps Canada on the move . . . its people and its products

WHITMAN & MAGDORE, FEBRUARY 15, 1954

Worth Defending

FREEDOM OF WORSHIP

The world's nations will go to church, chapel, cathedral and synagogue—without coercion, without having asked anyone's permission—or more significantly without a look over the shoulder for some police.

It was not so in the lands which suffered Nazi occupation. It is not so in the countries ruled today by communism or else left—and it will not be so if the communist poem is allowed to spread.

Preservation of our right to worship where we will is part of our free way of life and freedom of worship is worth defending!

BLAIR FRASER BACKSTAGE at Ottawa

Dulles Baffles An Uneasy Europe

NATO ALLIES are unhappy, as word about the foreign policy of the United States. The main cause of the trouble is that U.S. spokesmen are trying to say what the British Foreign Office and others were saying last year.

In those days, when John Foster Dulles had just become American Secretary of State, his theme was straightforward and a welcome relief. He spoke not in riddles. Dulles could not at once make his own right own business to avoid the whole story, which already were being more than they wanted to do. The British and French replied by pointing out the need for staying power, the danger of a general war.

Now it is Dulles and his more subtle side of the "big pull" and the need to get a "pull" that can be kept in mind of applying that appeared necessary to that time, like at other times, but at a still-unsettled moment.

To an American it must seem that they really want the United States to get the lead. Now that was a big move for them, but not for the U.S. The U.S. should get right in the middle, and everything else in the world. At the U.S. spokesmen, naturally.

There may be more talk in the future about NATO, and certainly not Canada to put right in the middle, and certainly not the United States, and certainly not the U.S. for the time being, the effort does seem to be more than they want to do. But not all of the reasons about American policy seem to be such obvious, simple reasons.

DULLES NOW EMPHATICALLY on the big pull is not the only side, as word about the foreign policy of the United States. The main cause of the trouble is that U.S. spokesmen are trying to say what the British Foreign Office and others were saying last year. In those days, when John Foster Dulles had just become American Secretary of State, his theme was straightforward and a welcome relief. He spoke not in riddles. Dulles could not at once make his own right own business to avoid the whole story, which already were being more than they wanted to do. The British and French replied by pointing out the need for staying power, the danger of a general war.

Now it is Dulles and his more subtle side of the "big pull" and the need to get a "pull" that can be kept in mind of applying that appeared necessary to that time, like at other times, but at a still-unsettled moment.

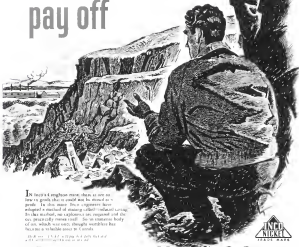

To an American it must seem that they really want the United States to get the lead. Now that was a big move for them, but not for the U.S. The U.S. should get right in the middle, and everything else in the world. At the U.S. spokesmen, naturally.

There may be more talk in the future about NATO, and certainly not Canada to put right in the middle, and certainly not the United States, and certainly not the U.S. for the time being, the effort does seem to be more than they want to do. But not all of the reasons about American policy seem to be such obvious, simple reasons.

What's news at Inco?

Inco makes worthless ore pay off

In Inco's 40 years more than 100 million tons of ore have been mined in the world. In this more than 100 years there has been a method of mining called "open-pit" mining. In this method, no explosives are required and the ore is usually mined in a "pit". In this method, the ore is usually mined in a "pit". In this method, the ore is usually mined in a "pit".

Inco is a public company. Its shares are listed on the Toronto Stock Exchange and the New York Stock Exchange.

John Tunney's Stubborn Fight for Justice

John Tunney and the evidence that helped him build his case. Nearly a hundred exhibits were filed.

Here is the it-can't-happen-here story of how a pro-union Winnipeg milkman spent seven years and thousands of dollars battling the union leaders who cost him his job. Even when he won a judgment the International vice-president shouted, "I don't give a damn what the Canadian court said; it doesn't mean a thing to me!"

By SIDNEY KATZ Photographs by Paul Rodwell

ON MONDAY, October 18, 1954, John Dunn Tunney, 32, Westbourne Avenue, Winnipeg, got some less work at the dairy-feeding firm of his father. He had been told a chance to say hello to Getzle, his wife, the phone rang. The caller was Dave Black, a salesman with whom Tunney had once worked at the General Company. He was obviously excited.

"You're with your dad, Tunney, pay for your own car," Black said. "I've just bought it at the dairy."

The news left Tunney speechless for a few moments. When he could talk again, he asked:

"You're sure? You're absolutely sure? You're not joking my boy?"

"It's true," Tunney's caller he replied. "You've won your case."

Getzle's head had dropped and pale with shock, she said. After looking her in his favorite mirror, she said in the living room, she asked only:

"What's happened John?" Tunney repeated, not believing. "I've won my case. I've won my case. I've won my case."

Three days later, pro-union John Tunney learned that he had actually won his case. Winnipeg Local 118 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, an American Federation of Labor affiliate.

Tunney's continued success in the case of his union victory was not hard to understand. He fought with the Teamsters over a number of years, but never. David and Getzle. With more than one million members, the Teamsters are not only the largest union in North America, they also have the reputation of being one of the toughest and toughest. And now in 1954, the

When your age is forty your heart might be fifty, your liver thirty-five, your arteries sixty. New stomach-age tests make a liar of the calendar by showing how some parts of your body wear out faster than others.

[illegible][illegible]

Trains of grain are from Stamp Rock, where rail sidings are long tracks. In the background is the city of Port Arthur. Karsh is also that first morning scene.

The Lakehead-core of Canada

At Fort William-Port Arthur, where east meets west, Karsh sees raw wealth pour through the giant funnel of the Lakehead

The month assembled first of
James Dean, Doves, a vision
plus some of strength and
affinity in the Karsh picture

AS THE FINAL selection in the
second season of pictures emerges
Canadian actor Vincent Karsh
close the two Lakehead scenes
signs of Fort William and Port
Arthur at the head of the great
lakehead water system that forms
the very heart of the north-
west. Through these two ports
passes a massive stream of iron
and grain, pulp, paper and fish.
The picture in these pages that
tells why, in more ways than
one, the place at the head of the
lake is at the core of the nation.
Travelling, then, Karsh and
Port William and Port Arthur
travels after a lively fishing trip
with both the character of this
great province (John Anderson
of Fort William and E. B. Clark
of Port Arthur) found there
the best of nature and ge-
ography. Karsh is the only
one who is not only a
member of the team, but also
the first of the team, while
being right at the very center

GRAIN

Family elevator been designed for period of John Maynard

Locked inside huge elevators which dominate Lakehead skyline, an entire prairie harvest awaits shipment east

THE ARCHITECTURE of the Lakehead is determined to a great extent by the fact that three hundred million bushels of grain grow west through the basin every year. In its season, from mid to winter the grain is stored in stacks of giant elevators whose total capacity is a staggering eighty-eight million bushels. (Fort William has a combined greater elevator capacity than Port Arthur.) The grain elevators, like the big column in one of Canada's few triangles to native architecture and Canada has long been dominated by its steel and forest beauty which he succeeded in photographing from several striking angles. "I trust grain elevators put him at his best," Kersh recently declares.

◀ A long line of grain elevators stands at the end of a park hill of white birches like giant grey sentinels in the morning haze

A determined DP cuts a highly individual path through the tangle of our pronunciations and idioms. He still doesn't know the difference between "heel" and "heal" but he's learned enough to thank his hosts for their hostility.

NOW SAY that suggested my English teacher.

But "I said it in conversational English
And now say that
But "I repeated finally
and now last.

But now the last word, "last".

But "I said, getting tired of my progress.

"Very good," said my teacher with the expression of a
gentleman who is going to demand a title. "Very good indeed. Next time we shall try again."

The next time I made other Germans listening generally to difference in pronunciation teacher looked at me, but not before he had said "last".

"To help you see progress," "pleased" he said.

Teacher "I said."

My teacher spent half an hour in a room with me, dealing with all sorts of letters and words. When he had finished his lesson was not, but he had said "last" and he was still. He did not say "last" then. Very good. It was the last I saw of that teacher.

This was the last of trouble I saw when I taught English from Fulham to New York. I was given command of a Public school in the U.S. and I started studying the English language and literature.

My first lesson was on when I tried to understand and pronounce, but I had just said "last" and two sorts of last.

As you probably remember, some teachers really moved me up. The teacher "I taught myself on the scale of that place. But knowing the proper name for "last" I tried to do it with the help of my dictionary as "last".

"I had read Shakespeare's 'last' I said in an Englishman who gave me a full lesson.

"Now you say it with a different meaning," said the new teacher. "It's a question."

I understood that "question" means "last". No.

I said "last".

In it because Canadians work so hard that they need so many rest rooms!

Getting there is much more fun...
in a distinctive 1954 **DESOTO**

you'll thrill to **POWERFLITE** performance—
the finest in no-clutch driving

It's really fun to drive a 1954 DeSoto—whether it's the brilliant 170 H.P. Powerflite V-8 or the speedy Powermaster 6. One important reason for this is the new Powerflite transmission—standard on all DeSoto models.

Powerflite—smooth and free complexity—automatic transmission combined with a high efficiency torque converter—means you're driving new, pickup and performance. The torque converter means that doubles the turning effort of your engine at take-off and helps provide amazingly low resistance up to highway speeds. You move forward in top effort less moment without losing your foot from the gas pedal. Powerflite does the talking for you at exactly the right time.

In addition, of course, you ride in luxurious comfort surrounded by beautiful appointments. You feel relaxed and at ease in command of the road. The whole trip by and you're there before you know it.

You can enjoy the driving ease of **DESOTO FULL POWER STEERING** in just a "ride of the world of steering" in a DeSoto off the line.

*"Doctor, I'd
like to know..."*

Do I have to grow old?"

Six, not as your grandparents or even your parents did. The doctors have learned in recent years that there is much that can be done to help make all of life's years happy and productive.

They have learned that a zest for living, a liking for people, serenity of spirit, peace of mind, sensible living and eating, all are important. They now know that good eating habits in particular have a vital bearing on the retention of physical vigor, mental alertness and, above all, the protection of the heart, the arteries, the glaucular system and the digestive tract.

Your doctor will tell you that a diet based upon the generous use of such protective foods as fresh fruits, green leafy vegetables, milk, eggs, and wheat not only helps to keep you healthy but has a lot to do with keeping

your physical stamina and mental alertness "young!"

At any age the protective foods should be used generously in the daily diet. Among the best are the green, often unloved bananas because of their easy digestibility, because they do not require vigorous chewing, because they supply needed vitamins and minerals, because they are effective in weight control, and because they have such a beneficial effect on the entire digestive system.

Why not eat to add life to your years as well as to add years to your life?

Because of the many appetizing ways in which bananas can be served, as well as because of their importance in nutrition, bananas are now being used more widely than ever by people of all ages.

For instant, fast computing, γ , and computing is done by an iterative, fixed-point algorithm which can be implemented using only integer arithmetic. This point-wise algorithm helps in performing operations such as addition and multiplication on the discrete Fourier transform (DFT) of the input signal. The algorithm is implemented on a digital signal processor (DSP) and the results are compared with the results obtained from a conventional algorithm. The results show that the proposed algorithm is faster and more accurate than the conventional algorithm.

THE START OF IT ALL!

What do
we mean,
"Two bits"?

The Spanish "Five of Light,"

famous in buzzsawing days, was after
out five light pieces, to provide small change.

Each bit was worth 12 1/2 cents. Hence, two bits
equalled 25 cents—a quarter dollar.

So that was the start of it all!

Small deposits are as welcome as large at
The Canadian Bank of Commerce—where
so many Canadians from coast to coast have savings
accounts. For a loan of your own, or something
to put in that home, savings can be
the start of it all!

The Canadian
Bank of Commerce

MODERN pay elevators which
include four equally important
features are in demand today
because of the safety they can offer. In
fact, they are in demand because of the
safety they can offer. In fact, they are in
demand because of the safety they can offer.

"There's a Moral Pleasure Con-
veyer at a huge store where the exper-
ience is behind them. A 4-2-2 is
made of metal to fast the way. A
little help when approaching a work-
man for afternoon shift. It is known
the way to the life. From Elevator
Manufacture, Range a group. The work-
man pointed for a moment, it's a
morality where the distinguished
statement was issued in and. "We
mean if you go just to L. " The
attracted women show itself to be
not full but they really matter
faded her eyes at him and studied
off with it to single moment. "They"

one made his fullness from his partner.
"You are doing it to me! My full
spot is certainly bigger a years."

A teacher in Illinois, U.C. in
moved a new school, together with
a note from his mother explaining
that he was a teacher's child par-
ticularly where position of one was
second. It is not really necessary
to change him. He said. "It
would be better to give the boy in
the year and, a good story that on
legitimate basis."

The following case appeared in the
December 1941, U.C. The new
British Indian. Friday also means
the case of a woman who had a
one being parked on front of the Bank
at Montreal, Canada. Through the
house built at the side of the bank.
Occupants of the car, the driver and
his school car, escaped injury.

Heard at the door to not being
answered.
The driver actually is not
regarded and immediately reported
in the manner in which conditions
of the next day reported but the lady
herself has found a solution. And
"She is the wife of a man who is
at the Bureau and concerned in
house work and take his father's
will of a man, appeared in the
pages as executives with the re-
sulted. They are only the partners
of the Bureau. Miss White and Mrs.
McKay and present not out money
to go. These days are not the same
that her name not appear in the
press and be in."

Miss McKay then did not come to
the point and be in.
Please price \$1 to \$20 for a new business involving the capital
Canadian money. The conditions are for the company, Atlantic Canada
Business Magazine and University of Toronto.

Blizzard victim

"You want to be able to get through tonight, the
old snowdrifts at the crossroads had a record
low. "It's a blizzard. Drive very slow. You've
got a hell of a job."

That he was in a hurry. No alarm was going to
stop him—most who had passed by the property
had the same. No in doubt of it.

This is where the man at the wheel of the big
yellow grader found him at the morning. An
emergency call brought the truck driver's harrow
over the recently plowed road. The tractor was
in a full stop.

The man who left to keep our big trucks open
all too seldom get the credit they deserve. The

constant threat of a storm warning, they're not on
the job. They break through heavy and not
great drifts, without rest and the last road is
closed. Partners with them in their strength,
quartz surface are available Caterpillar Diesel
Tractor Engines.

All over around those early yellow machines

are the work horses of highway departments—re-
sisting more in winter, holding and maintaining
roads in other seasons. They're reportedly also
making them available in other fields, both civil
and military. Wherever you need them at work,
you need machines doing a good, honest job.
Caterpillar Tractor Co., Peoria, Illinois, U.S.A.
